

### Shimpo 30" Slab Roller:

Shimpo's heavy-duty **Slab Roller** can produce up to a 3" thick slab. Two-roller system evenly distributes pressure on the slab to reduce warping. The dual-hand wheels and thickness indicator provide synchronized fine adjustment and allow for precise control of the slab thickness. Shimpo's **Slab Roller** also includes a wagon wheel handle that provides effortless feeding of slab through rollers in either direction. It features a large 30" x 50" table for plenty of workspace and comes with one canvas set to complete the package.

Suggested Retail Price: \$895.00

**L&R Specialties Price: \$800.00**

### Ceramic Supply Slab Roller:

The Ceramic Supply 30" Slab roller (CSR 30) is engineered for a heavy duty studio or class room use, yet economically priced for everyone's budget. Designed with 2-1/2" aluminum alloy knurled rollers so that clay slabs are easily pulled through. Package includes roller system, table frame, counter tops, two handles and canvas. The table frame is constructed of 14 gauge powder coated steel.

### North Star Slab Roller:

Item #550: 24" Standard Slab pkg.

Item #551: 30" Standard Slab pkg.

The Standard Series Slab Roller are manufactured in 24" and 30" draw width (the width of the rollers) which are mounted in the center of the 4' table. The slab roller itself is sturdy, professional, and requires most no maintenance, yet it is safe enough for even elementary classrooms. Two driven rollers 2-1/2" in diameter by 24" and 30" long are linked by nylon gears. Clay is sandwiched between canvas, then cranked into the machine. Knurled rolls grips the canvas and the clay pulls through easily. It is the most versatile slab roller available featuring an infinite thickness adjustment with no shims or boards. Simply crank the thickness dial up or down to make adjustments. This machine accepts texture materials such as leaves and rope.
